

Drive Safely

Buckle-Up!!!

It Will Help Keep You and Your Child Safe

1. The best protection you and your child have in a vehicle is your seat belts- don't go any where without buckling them up first
2. If your child travels in a wheelchair, don't forget to also fasten the tie-downs- they'll help keep the wheelchair in place
3. Don't forget to check your gas before you leave on a trip- running out of gas is no fun
4. Don't EVER get into a car when the driver has been drinking alcohol
5. Always drive with a licensed driver- if the driver has a permit, then someone else in the car must have a license
